

Web committee plan

Vision :

- 1.The members have the ability to create valued applications and to sell them to multinational companies.
 - 2.At the end of every season, the members should be qualified enough to be assigned to multinational companies.
-

Mission :

- 1.Choose random member in every meeting to be head of that meeting and organize everything about it .
- 2.Initiate a web workshops for the students in the college.
- 3.During the first recruitment ,we will choose the member that his/her knowledge is average and it must be necessary to show us a sample of his/her work in the interview .
- 4.During the second recruitment, we will accept only the member that his/her knowledge is very good .
- 5.Divide the members into two teams (frontend, backend).
- 6.After the first recruitment, I will take 2 weeks to revise everything, then we will start working on the projects.

7. The single team of the project will consist of backend and frontend members.
 8. At the end of the first semester ,every team must finish one project (at least) that will be shown in the Salakhana ,and also we will work on OSC website.
 9. The members on the team must exchange the knowledge between them ,so that in the end of first semester all member will have a good amount of knowledge about the backend & frontend.
 10. In every project, the members will choose new feature they can add it in that project and learn it themselves ,then after that project ends , every team will explain this new features to all members of the committee so that all the members could share knowledge.
 11. Every team has a mentor and team leader .
 12. During the first and second semester ,we will work on OSC website.
 13. At the end of the season , every team will finish two different projects .
 14. Every project will take at least 3 weeks .
 15. Deal with PR committee in order to make session to train new comers so that they would be able to teach and explain in the next workshop.
 16. The rest of the season we will learn android through two different ways:
 - 1) Some members of web committee will learn android then they will teach it to the rest of the members.
 - 2) Request from projects committee to teach us .
-

Rules :

- Every member must attend all the meetings , if one of the members will not be able to attend he/she must inform the head of the meeting before 24 hours otherwise alert will be sent.
- 15 mins delay to meeting will cause the member to pay 5 LE , if more than 15 mins he/she will pay 5 LE and minus 2 mo7sens per 10 mins.
- If one of the members refused to play a certain role that was assigned to him/her during any event (exp salakhana, interviews), he/she must inform me or vices during the next 24 hours only , otherwise, a punishment of 10 LE will be paid.
- If the member took the task ,and he/she didn't accomplished it on the deadline he/she will lose mo7sens (depends on the kind of the task) and still have to complete his/her task .
- If the member repeated the previous situation, he/she will pay punishment (depends on the kind of the task) and an alert will be sent to him/her and they still have to finish the task.
- If the member didn't attend the meeting for any reason ,he must study the content of the meeting and sending the task online to him.
- If the member did the task on the deadline , he/she will obtain mo7sens(depends on the kind of the task).

- Every month I will publish the best member of the month called ("the geek of the month").
-

SWOT analysis:

Strength:

1. Different backgrounds will make the team stronger.
2. Having several members in the last season helped us to exchange knowledge and information between us.

Weakness:

- The wide number of members caused the mentors to lose control of the members' understandings , task controlling, etc.

Opportunities :

1. The members who had high learning curve helped the rest of the members educationally.
2. Planning and setting a certain goal will help the members to achieve what they want.

Threats

1. Change the plan for urgent reasons.
 2. Lack of agreed number of members.
-

Advantages of the previous season :

- I gained a lot of experience from my team members.
 - I knew a lot of about leadership due to task I took.
 - This season was more effective than the previous season.
 - I gained a lot of knowledge.
 - I gained a lot of skills in dealing with teamwork than I use to be .
 - The idea of mo7sens created a challenge and was a great motive for all the members.
-

Disadvantages of the previous season:

- The contradiction between the deadline of the tasks and the collage work .
-

Number of members:

Minimum : 14 members

Maximum : 18 members Including 2 vices .

Meetings of the season :

1st meeting : (will be held after the GM)

- 1) All members know each other .
- 2) Put the rules of the season .
- 3) Determining two vices.
- 4) Determining the content that we will learn it

2nd meeting : (will be held after 2 weeks from 1st meeting)

- 1) Decide the ideas of the projects and new technology for the projects .
- 2) Determining the team members of the projects and team leader.
- 3) Determining the mentors .
- 4) Determining the deadline of the project.

3rd meeting : (will be held after completeness of the first project)

- 1) Every team will explain to us the project.
- 2) From every team ,one of them will explain to us the new technology.

NOTE : another meeting will be held if needed.

4th meeting :

- 1) Determining the features that we will add them in OSC website.
- 2) Determining the deadline of the task.
- 3) Determining the team members .
- 4) Discuss about the workshop.

5th meeting :

The same content of that 2nd meeting .

6th meeting :

The same content of that 3rd meeting.

7th ,8th ,9th meetings :

Will discuss about android and learn it .

NOTE : if we need more than 9 meetings , another meeting will be held .

Web workshop sessions :

- 1) Javascript
 - 2) Bootstrap ,Mysql
 - 3) Php
 - 4) Laravel
 - 5) Laravel
 - 6) Laravel (if needed)
-
